

Chassis Cast iron Parts Suspension System Steering support device

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Dongfeng
- Certification: IATF 16949:2016
- Minimum Order Quantity: 100 piece
- Packaging Details: Wooden box packaging
- Delivery Time: Spot goods
- Payment Terms: T/T

Product Specification

- Cost: Moderate
- Machinability: Good
- Dimensional Accuracy: High
- Corrosion Resistance: Yes
- Material: Cast Iron
- Surface Finish: Rough
- Tensile Strength: High
- Surface Treatment: Painted
- Heat Resistance: Yes
- Color: Black
- Installation Method: Bolted
- Compatibility: Universal
- Application: Automotive Industry
- Impact Resistance: Yes
- Dimensions: 50cm X 30cm X 20cm

Product Description

Automotive chassis system castings are a vital component in modern automobile manufacturing, directly influencing the safety, stability, and reliability of vehicles. As the core components of the car chassis, these castings bear the crucial tasks of supporting the body, transmitting power, and absorbing vibrations. Our company is dedicated to producing high-quality, high-performance chassis system castings to meet the ever-increasing demands and expectations of customers.

Our casting products cover various key components of the chassis system, including suspension brackets, steering gear housings, brake caliper housings, and more. These castings are made of high-quality metal alloy materials and undergo advanced casting processes and precision machining to ensure excellent mechanical performance, durability, and corrosion resistance. Our products are not only well received in the domestic market but also exported to overseas markets, earning trust and praise from customers.

To ensure the quality and reliability of our products, our company has established a strict quality management system, with strict control at every stage from raw material procurement to production processing. We have advanced production equipment and testing equipment to conduct comprehensive and precise quality control and testing. Our casting products have not only passed the ISO9001 quality management system certification but also obtained multiple product quality certifications and patent technology certifications, ensuring that the products meet international standards and customer requirements.

Our company emphasizes technological innovation and talent development, with a high-quality, professional R&D team and production team. We continuously introduce and absorb advanced production technology and management experience from home and abroad, constantly improving the technical content and added value of our products. We have also established long-term and stable cooperative relationships with well-known automobile manufacturers at home and abroad, jointly promoting the development and innovation of automotive chassis system casting products.

We will continue to uphold the business philosophy of "quality first, customer foremost," continuously improving product quality and service levels, providing customers with even higher quality products and services, and jointly creating a bright future for automotive chassis system casting products.
